

Lindab **VRA**

Volume flow regulator - rectangular

Volume flow regulator

VRA

Dimensions

NB! Different flange types are available, see order code and dimension table below.

Description - Compact

VRA is a rectangular VAV unit with combined regulating damper and airflow measurement in one unit, used for pressure independent volume air flow rate regulation.

VRA Compact is available with actuators for different communication platforms; Belimo MP, Modbus/BACnet or KNX. (For VRA Universal see details on next page).

To avoid clogging of the measuring cross, it is recommended to use VRA only in applications with clean air, meaning free of dust, particles and similar.

- Pressure independent VAV regulation.
- Belimo MP, Modbus/BACnet or KNX.
- Integrated NFC interface, compatible with Belimo Assistant App (only MP).
- Tightness class ATC4 (formerly Class B) according to EN1751.

Dimension table

Flange type	d mm	L _{VRA} mm
LS	20	453
RJFP20	20	493
RJFP30	30	513
RJFP40	40	535

Motor type table

Type	Motor	c mm
MP	NMV-D3-MP	115
KNX	NMV-D3-KNX	115
MOD	NMV-D3-MOD	115

Order code

Product	VRA	aaa x bbb	ccc	dddd
Type	VRA			
Dimension	Min. : a x b = 200 x 100 mm Max. : a + b ≤ 2400 mm and a ≤ 1500 mm			
Motor type	MP, KNX, MOD			
Flange type	LS RJFP 20 (Standard All sizes) RJFP 30 When a or b > 800 RJFP 40 On request			

Example: VRA-500x200-MP-RJFP 20

Factory settings

	Standard
Min. Air flow	0
Max. Air flow	V _{nom} (7 m/s)
Control signal	2 - 10 V
Feedback signal	Damper position *

* Valid for MP.

Tightness class

Blade area m ²	Tightness class
up to 0.6	2
From 0.6	3

Tightness for damper blades according to norm EN 1751, (leakage through closed blades).

Installation

VRA is prepared for insulation with 50 mm thick insulation material. VRA can only be installed with damper blades in a horizontal position.

Using LS-profile. Installation instruction, please go to Assembly instruction, Rectangular air duct systems, [LS-profile](#).

Using RJFP-profiles. Installation instruction, please go to Lindab rectangular duct systems, [RJFP-profile](#).

You can find general information about air duct systems, theory and calculations following this [link](#).

Volume flow regulator

VRA

Description - Universal range

VRA is a rectangular VAV unit with combined regulating damper and airflow measurement in one unit, used for pressure independent volume air flow rate regulation. VRA Universal is equipped with regulator and rotary actuator. Regulators comes with either flow sensor (D3) for clean air or membrane sensor (M1) for contaminated air. Actuators are available as standard universal (UNI), spring-return (SPR) or fast-running version (FAS). (For VRA Compact see details on previous page). To avoid clogging of the measuring cross, it is recommended to use VRA only in applications with clean air, meaning free of dust, particles and similar.

- Pressure independent VAV regulation.
- Belimo MP, Modbus, BACnet & analogue control 0(2)-10V.
- Integrated NFC interface, compliable with Belimo Assistant App.
- Tightness class ATC4 (formerly Class B) according to EN1751.

Volume flow regulator

VRA

Technical data

Volume flow measurement

The accuracy of volume flow measurement depends on the flow conditions in front of the measuring cross. It is preferable to have a long straight duct section in front of the measuring point, according to the table below.

If these recommendations are not followed, it will cause an unstable flow measurement and therefore higher inaccuracy in the regulation of the required air flow.

Components	Recommended straight duct before unit
Bend	3 x d _h [*]
Tee-piece	4 x d _h [*]
Damper	6 x d _h [*]
Rectangular attenuator (Extract)	1 x d _h [*] (min. 500 mm)

d_h^{*} is the hydraulic diameter for a rectangular duct (and VRA), d_h can be calculated by using VRA dimension a and b:

$$d_h^* = 2 \times a \times b / (a + b)$$

Examples:

Example above showing recommended straight duct distance between VRA and duct bend.

Minimum recommended distance between VRA and a rectangular attenuator:

Example above showing recommended straight duct distance between VRA and rectangular attenuator. (For supply air and extract air).

NB! Distance must as a minimum be ≥ 500 mm .

VRA

Technical data

Settings

V_{nom} indicates the measuring range for the actuator. A standard VRA is calibrated to a V_{nom} of 7 m/s according to the table below.

In special cases the VRA can be set to a higher V_{nom} , e.g. 10 m/s.

For VRA, V_{max} and V_{min} indicate the limits for the actuators working range.

There is linearity between V_{min} to V_{max} and the input signal. V_{max} can be set in the range 20-100% of V_{nom} , V_{min} in the range of 0 - 100% of V_{nom} ($< V_{max}$); however, air velocities below 1 m/s corresponds to a measuring pressure of less than 1 Pa, which makes the flow regulation less accurate.

VRA nominal air flow (V_{nom}) and measuring limit.

Size mm			Measuring limit = 1 m/s		(Standard) $V_{nom} = 7$ m/s		$V_{nom} = 10$ m/s

Volume flow regulator

VRA

Technical data

Adjustment and simulation tool

- Graphical display of setpoint and actual values.
- Create and print trend evaluations.
- Useful tool for troubleshooting on the MP-Bus®.
- Access levels can be defined and managed via release code.
- Specialised software for OEMs to make efficient use of the tool in the production process.

ZTH EU Service Tool

- The handy ZTH EU Service Tool is connected directly to the actuator for parameterisation.
- Reliable and proven connection via the tool socket.
- Supply via actuator – always ready.
- MP-Bus® tester integrated (packet counter, signal level).
- ZIP level converter to USB for connecting the actuator with the PC Tool.

You can find further information about the possible connections of the ZTH EU Service Tool at Belimo.com.

Belimo Assistant App

- Belimo devices marked with the NFC logo can be parameterised using the Assistant App.
- Can be installed on all Android mobile phones and iPhones.
- Can be operated with ease using the smartphone's touch display.
- The actuator can be parameterised while de-energised.
- Updates are undertaken automatically via the Google Play or Apple App store.

ZIP-BT-NFC Bluetooth to NFC converter

- Allows for simple use of the Belimo Assistant App via Bluetooth with Android mobile phones and iPhones in order to parameterise NFC enabled devices.
- Safe to attach to the actuator thanks to countless micro suction cups attached to the bottom.

Most of us spend the majority of our time indoors. Indoor climate is crucial to how we feel, how productive we are and if we stay healthy.

We at Lindab have therefore made it our most important objective to contribute to an indoor climate that improves people's lives. We do this by developing energy-efficient ventilation solutions and durable building products. We also aim to contribute to a better climate for our planet by working in a way that is sustainable for both people and the environment.

[Lindab](#) | For a better climate
